

Applied Behavior Analysis

ABA is the culmination of years of behavior research aimed at yielding observable changes. It has been endorsed by the American Academy of Pediatrics and the US Surgeon General as an effective and safe treatment. ABA is based on the principles of learning and motivation to support effective teaching. It works to bring about meaningful and positive changes by encouraging a variety of skills through the use of positive reinforcement.

At Rising Star We Believe ABA Should

- ★ Encourage functional communication and language skills
- ★ Teach your child how to appropriately get their needs met
- ★ Follow and build upon your child's intrinsic motivations
- ★ Broaden your child's interests
- ★ Include family involvement
- ★ Be something your child looks forward to!

Our Goals

We are dedicated to improving the lives of children with special needs. We do this by developing and implementing a treatment plan based off the results of your child's assessment. We know that as parents/caregivers you are the most important person in your child's life and that's why we believe in collaboration and strong family involvement. Treatment rooted in ABA is data driven, meaning that we will work alongside you to make the most objective treatment decisions possible. Through this model we strive to address the diverse needs of your young learner.

Our Services

- ★ Home based 1:1 direct therapy
- ★ Assessments and evaluations
- ★ Development of treatment and behavior plans
